South Bend Water Works

US EPA RECORDS CENTER REGION 5

SUBJECT Water Distribution System

The area served by [REDACTED], north of the city, is not connected to the rest of the distribution system. Plans are under way to hook the area up, but they will not be complete for five years.

The southern portion of the distribution system, indicated by the dotted line on the distribution map [REDACTED] operates essentially separate from the rest of the system.

The [REDACTED] is all on private wells
